

# Welcome to EDF

A guide to following your onboarding journey...

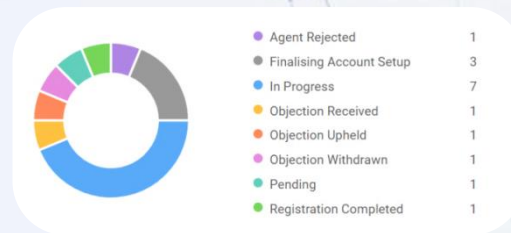

**We've made improvements to MyBusiness to help you track and manage your MPANs as they move to EDF.**

## Registrations widgets

If you have MPANs going through the registration journey you'll see the new registrations menu on the left-hand taskbar.

Here you'll find three helpful widgets:

- **Onboarding summary** - you can click the link under each status to go to a pre-filtered report providing greater detail
- **Registrations** - a pie chart showing a break down of your MPANs and their statuses
- **Objections** - this widget shows MPANs that need action

To view an explanation of the statuses, click on the **?** on each widget

## Registrations report

On the company homepage we've added a registrations tab that will help you keep track of your MPANs moving across to EDF. Here you can filter by company or status and download a CSV copy of this report by clicking the download button.

We want to keep you updated throughout the onboarding journey, and may need you to provide information to make sure this runs smoothly. We'll let you know how your sites are progressing and if you need to take any action by sending you an email or notifying you in MyBusiness.

You can raise a query directly from the registration page by clicking **...** in the action column and a member of our Welcome Team will be on hand to answer your question.
