### Please read through this part of the form and the Part RSR-A guidance notes before you fill it in.

It will take about two hours to fill in this form.

Fill in this part of the form for all applications relating to a radioactive substances activity.

Please keep a copy of this part of the form once you have filled it in for the first time. You will be able to reuse it if you need to apply for a variation or another radioactive substances activity permit.

If you are reusing this part of the form, please highlight any changes you have made to the information you provided previously. You do not need to resubmit any documents (questions 9c, 12, 13) unless something has changed.

For a transfer application, this part of the form should be filled in by the person the permit will be transferred to.

# Application for an environmental permit

## Part RSR-B3 – New bespoke radioactive substances activity permit (nuclear site – open sources and radioactive waste)

### Please read through this part of the form and the part RSR-B3 guidance notes before you fill it in.

It will take about 3 hours to fill in this form.

If you are applying for a new bespoke permit for a radioactive substances activity involving open sources and/or radioactive waste on a nuclear site, fill in this part of the form, together with parts RSR-A and RSR-F. If you want to make on-site disposals of solid waste to land, also fill in part RSR-B5.

For security reasons, do not refer to sealed sources on this part of the form. There is a separate part (RSR-B2) for radioactive substances activities involving sealed sources.

If your application relates to a nuclear power station that has been through the generic design assessment (GDA) process, you must clearly identify:

- any information that is different from that provided for GDA;
- where you have addressed any GDA issues and assessment findings related to the GDA statement of design acceptability.
