Certainty (fixed) PPA explained

How does it work?

Once your generation is up and running, you will be required to export a minimum of 0.5 GWh per year to enter into EDF's Certainty PPA. In return, you will receive a fixed price for your output for the contract duration. Our Certainty PPA offers; either a single rate or seasonal time of day (STOD) rate.

You can also sell your ROCs and REGOs within the Certainty PPA.

Why choose this option?

Our Certainty PPA gives you budget and income certainty as your generation income is fixed at contract signature and not exposed to wholesale market fluctuations. This gives you assurance in a volatile energy market, helping you deliver to your budget and, should you require, helping to put together a sound investment case. The main benefit is that before your contract starts, you are clear about the income you will receive throughout your contract.

Is the Flex PPA right for me?

This contract is suitable for businesses who will be exporting at least 0.5 GWh per year and be able to provide a level of certainty about when and how much electricity will be generated. Ideally you would have historical generation data available.

How do I get started?

We have a number of contract options for your business; if you think that our Certainty (fixed) PPA is right for you, get in touch with the PPA Team to discuss how we can help.

e-brochures

a better way of working

Why an e-brochure? At EDF we are committed to using the most sustainable working practices wherever possible and this includes when delivering communications to our customers.

E-brochures significantly reduce the volume of printed material we need, reducing our carbon footprint.

Our customers appreciate e-brochures because they offer timely delivery of easy to access information in an ideal format for the modern screen based working environment.
