

"I work with large industrial and commercial customers to develop a fully funded turnkey solution for Behind-the-Meter Solar. I love that my role is directly making a difference for the planet!"

Aimee Williams, Business Developer (former Renewables Commercial Graduate)

What experience will I gain during the Renewable Energy Commercial programme?

During our two-year programme you'll develop your commercial understanding of the renewable energy industry and undertake assignments to support the provision of commercial, strategic and analytical advice to internal stakeholders.

What kind of placements will I complete?

Our programme is designed to help you develop a broad set of skills, with the opportunity to specialise towards the end of the programme when you'll start to think about a permanent role.

Embark on a transformative 2 year training programme, where you'll learn from experts, develop a commercial understanding of the renewable energy sector and complete placements supporting of commercial, strategic and analytical business decisions. You'll experience three different 8-month placements throughout your time on the scheme.

You'll gain an understanding of the key aspects of project development, such as origination, project management and valuation, all of which is geared toward reaching investment decisions on wind, battery and solar assets.

EDF Renewables UK & Ireland

The UK and Ireland needs new, affordable low-carbon electricity. As one of the UK and Ireland's leading renewable energy companies, EDF Renewables specialises in wind power, solar and battery storage technology.

We develop, build and operate renewable technologies throughout their lifetime. We currently have an operational portfolio of 36 wind farms (including two offshore wind farms) and we have an ambitious vision for solar and battery storage.

EDF Renewables is a joint venture between EDF Renewables Group (EDF's global renewable business) and EDF Energy (EDF's UK generation business).

Our aim is to do whatever we can to ensure all our customers enjoy access to a diverse, reliable, and affordable low-carbon energy mix for decades to come.
