

"The support at SZC is unmatched! The help and opportunities I have been given to learn and grow from my managers are fantastic."
Georgia Pleasants, HR Apprentice

What experience will I gain during the Nuclear Business programme?

During your training you'll complete a series of placements lasting up to 6 months, where you'll have the opportunity to submit your preferences for the areas you're interested in, across the corporate level of the project.

Placement opportunities will be determined by the business need and may include; Corporate Compliance, Financing (including learning about investor funding), Finance and Regulation, Environmental, Social and Governance strategy, Public Affairs, working with Government and Stakeholder engagement.

Why choose Sizewell C?

Sizewell C offers long-term, well-paid careers across a vast range of skills and disciplines.

You'll contribute to one of the most exciting megaprojects in the world, whilst being at the forefront of the UK's climate change agenda and energy policy.

The UK is experiencing a nuclear renaissance and Sizewell C – along with its sister project at Hinkley Point C in Somerset – is powering the change. We're ramping up at pace as we look ahead to the Financial Investment Decision in early 2024, and the start of construction soon after. When completed, it will provide dependable electricity to 6 million homes for 60 years.

It's a perfect time to join our project. You'll have the opportunity to shape the working culture of what will be one of Europe's largest construction projects, while also helping Britain to reach its target of Net Zero emissions by 2050. That's one of the reasons Sizewell C will be unlike anything you've ever experienced before.

You're guaranteed to gain unique insight into the nuclear sector, learn from industry experts and build valuable networks.

"Our Nuclear Business Graduate Scheme will put you at the forefront of our corporate teams, which are integral to the future development of the project.

Come and join us on this exciting journey to helping Britain achieve Net Zero."

 **Julia Pyke**, Joint Managing Director
