LATEST DOME LIFT INSIDE

FINANCING THE FUTURE OF SIZEWELL C

Katherine Horrell explains the finances and relationships that are making the project a reality after reaching a Final Investment Decision

Prefab-ulous Hinkley Point C's dome lift success

Power Purchase Agreement success at North Kyle Wind Farm

Mental health challenges fathers can face

EDITORS' NOTE

There's always incredible work and personal journeys within our company.

Congratulations to Sizewell C on the recent Final Investment Decision. Katherine Horrell, the Treasury Director for Sizewell C, shares how both finance and relationships play pivotal roles in the success of the project.

At Hinkley Point C, Tom Moore explains how pre-fabrication has significantly boosted efficiencies and celebrates the complex task of lifting the dome onto Unit 2.

North Kyle Wind Farm demonstrates the remarkable transformation of a former coal mine into a hub for renewable energy. EBS explains the successful CfD Purchase Power Agreement.

Two dads share some of the mental health challenges that fathers can face, and Donald Zindoga discusses how his stepfather's career in nuclear energy inspired his own path.

And finally, for a bit of fun, don't miss our summer quiz!

SOLAR-POWERED TUBE

FIND OUT MORE ON THE EDF POWER SOLUTIONS WEBSITE

↗ (L-R) Lilli Matson, TfL's Chief Safety, Health and Environment Officer, Mete Coban MBE, Deputy Mayor for Environment and Energy and EDF power solutions CEO Matthieu Hue.

EDF power solutions has been appointed by Transport for London (TfL) to power the Tube through its new Longfield solar farm in Essex. The contract supports the construction of Longfield and is expected to save over 28,000 tonnes of carbon and provide stable renewable power at a fixed price when it's operational.

Matthieu Hue, CEO of EDF power solutions, said: "This marks a significant step forward for the delivery of our Longfield solar farm. This agreement is built upon our shared commitment to sustainability and investing in clean energy, helping to power essential public services with low-carbon electricity and support the UK's journey to net zero."

BERNARD FONTANA VISITS THE UK

Bernard Fontana, the new Chairman and Chief Executive Officer of EDF, visited our head offices at Nova North in London recently to give a presentation and Q&A session about his vision and priorities. Simone Rossi, CEO for the UK, introduced Bernard, and around 100 people attended the Town Hall.

POWERING THE PARTNERSHIP BETWEEN FRANCE AND THE UK

During the State visit by French President Emmanual Macron, Bernard Fontana joined a State banquet hosted by His Majesty The King, and CEO Simone Rossi joined a banquet with the President hosted by the Lord Mayor of the City of London. Our Chair, Sir Alex Chisholm, represented EDF at a roundtable at Number 10 with leading French and UK companies to discuss how we can build on the UK-EU agreement to build a deeper economic partnership, and more broadly ensure that Europe stays competitive.

↗ Sir Alex Chisholm and the Prime Minister.

DALKIA FACILITIES GOES NUCLEAR

Dalkia UK has taken over facilities management of our operational nuclear fleet. This move will welcome around 1,000 new employees to Dalkia Facilities, enhancing service quality and safety. It's an exciting step forward for Dalkia, making the nuclear sector 25% of its business activity.

Noel Clancy, Managing Director of Dalkia's Facilities Division, said: "Our appointment is a strong validation of our capabilities, expertise, and continued commitment to delivering high quality solutions for our customers. I look forward to welcoming our new colleagues to Dalkia UK."

FINANCING THE FUTURE OF SIZEWELL C

As the project reaches a Final Investment Decision, **Katherine Horrell**, Treasury Director at Sizewell C, shares how finances and relationships are crucial to the project's success.

Can you tell us about yourself?
I'm a self-confessed crazy cat lady and enjoy watching rugby – I'll be going to the Women's Rugby World Cup which is in the UK this year. Eight years ago, I lost my partner to cancer, and I enjoy attending social events with the Widowed and Young (WAY).

> While Sizewell C is a separate company from EDF, the relationship is crucial.

Can you describe your role?
The Treasury Director is an executive committee position because financing is crucial to the project's success. We're currently implementing a new financing structure involving both equity and debt, and my role is to oversee this process and build a team and capability to manage the financing on an ongoing basis. The equity and debt arrangements are designed to last for the entire life of the project, which includes 12 years of construction, over 60 years of operation and decommissioning.

How does Sizewell C work with EDF?
While Sizewell C is a separate company from EDF, the relationship is crucial. EDF Group has agreed in principle to invest up to £1.1 billion in the project now that the final investment decision has been announced. EDF's shareholding in Sizewell C will then be approximately 12.5%, but will act as a contractor rather than an owner.

The Government has just announced the Final Investment Decision, and has committed £14.2 billion of further funding. What does this mean, both for the project and for the UK?
The final investment decision is a significant step forward and shows the government's commitment to making Sizewell C a reality.

This funding is reassuring for our employees as well as our commercial and financial partners. The energy system is complex but nuclear brings huge economic benefits. It is crucial for the country as it generates a substantial amount of low-carbon, reliable and cost-effective energy. This is vital for the UK's energy security, especially in the current global climate.

Sizewell C will benefit the local community and broader economy by creating 10,000 jobs and supporting thousands more through the supply chain. It's great to see the UK commit to such a big project which will have a positive impact on the country for many decades to come.

Sizewell C will benefit the local community by creating

10,000 jobs

“

It’s great to see the UK commit to such a big project which will have a positive impact on the country for many decades.

What has been involved to get to this stage?
The project has been in the making for years, with the early planning of finances, obtaining the Development Consent Order (DCO) and securing a nuclear site licence. Although I’ve only been with the project for a year, I’ve witnessed the immense effort and dedication that the team gives to the project.

You’re leading the capital raise, who are the investors?
The government has confirmed it will take an initial 44.9% stake to become the single biggest equity shareholder in the project – meaning the British people will benefit from the government’s investment. The new Sizewell C shareholders include La Caisse with 20%, Centrica with 15%, and Amber Infrastructure with an initial 7.6%. This comes alongside EDF taking a 12.5% take in the project announced earlier this month.

How will Sizewell C benefit from its relationship with EDF?
EDF’s design and capabilities, along with technology and supply contracts for key equipment, are critical to our success. We’re benefitting from the trailblazing work the team at Hinkley Point C has done in construction, knowledge and expertise.

By replicating and using key learnings from Hinkley Point C, we can manage costs effectively and this will give confidence to investors, the government and the public.

Sizewell C will feel different in the way it’s run and its interactions with the board and shareholders. It’s an interesting new world and it’s really exciting.

EDF’s UK CEO, Simone Rossi, shares a note on Sizewell C’s Final Investment Decision.

READ IT HERE

“

It’s an interesting new world and it’s really exciting.

PREFAB-ULOUS DOME LIFT

Tom Moore, Civils Programme Manager at Hinkley Point C, shares how prefabrication has boosted efficiencies in lifting the dome onto Unit 2.

Tell us about yourself
I'm originally from Manchester and now live in Somerset with my wife and our six-year-old son. I've recently taken up golf with my son. I also enjoy indie music – I'm a big fan of Oasis, though I haven't managed to get tickets for their upcoming gigs yet!

Can you describe your role?
I oversee the civil engineering programme which encompasses all building construction and structures. We work closely with Bylor, our contractor, and have an integrated approach. The civils works programme consists of 1,450 employees and around 5,500 workforce.

1,450
employees

5,500
workforce

20-30%
faster, with fewer people

Why is lifting the dome onto Unit 2 important?
It's a huge milestone for the year. The second dome changes the site landscape and signifies the next step, creating a controlled environment that allows mechanical and electrical equipment programmes to operate inside a weathertight building.

What benefits have you seen from replicating the dome lift on Unit 1 in December 2023?
We're able to take the learnings and knowledge from Unit One and be more efficient. Many of the people who worked on Unit 1 now work on Unit 2, taking first-hand experience with them. By delivering work in a different sequence, we've been 20-30% faster, with fewer people.

How is prefabrication helping in the construction?
Prefabrication is modular construction – we're effectively building a large modular reactor. Prefabrication ranges from large pieces of concrete to smaller reinforced cages, which are then lifted into place. An example is the 170-tonne staircase 'mega lift' by Big Carl in February.

Up to 60% of prefabrication is done in controlled environments, either off-site in our Avonmouth facility or at one of our on-site facilities. It's safer, more efficient and we can deliver to high standards.

Prefabrication and automation also have the potential to address some of the labour skills shortages we face.

→

> Hinkley Point C will be here for my grandchildren. It's providing long-term energy security, benefiting not just the present but future generations.

Will Sizewell C benefit from these learnings?
Absolutely. We regularly share information with the Sizewell C project to demonstrate what can be done in modular construction and optimised work sequences, helping to deliver their project in a shorter timeframe.

How is Hinkley Point C contributing to UK energy security and electrification?
Nuclear power is crucial for reducing the country's reliance on other energy sources and from other countries. Hinkley Point C will be here for my grandchildren. It's providing long-term energy security, benefiting not just the present but future generations.

How does it feel to have successfully put the dome onto Unit 2?
I'm incredibly proud of all the teams who have worked so hard to make sure we could complete the lift on schedule. Their passion, problem solving and determination is inspiring. But it's not just those physically working on the dome, it's all those supporting our site infrastructure too – the bus drivers, canteen workers and cleaning staff – we're all pulling together to make this a reality.

FIND OUT MORE ON eNZO

EDF power solutions

A NEW NAME WITH NEW OPPORTUNITIES

On 3 July, EDF Renewables UK and Ireland changed its name to EDF power solutions UK and Ireland.

Following the merger of EDF Renouvelables (the 51% shareholder of EDF power solutions UK and Ireland) and EDF International Group, a new name was needed to better reflect the diverse mix of technologies the Group develops and operates. This includes onshore and offshore wind, solar and battery storage, as well as services such as Power Purchase Agreements (PPAs), private wire and commercial and industrial solar.

As part of a global organisation, the company has a presence in Europe, North America and parts of the Middle East.

> To go further on our decarbonisation journey, we need to be able to integrate renewables to an energy system. We need these solutions to enable renewables to grow further for customers, to adopt this decarbonisation solution.

MATTHIEU HUE
CEO EDF POWER SOLUTIONS UK AND IRELAND

OUR MISSION

EDF POWER SOLUTIONS UK AND IRELAND'S MISSION REMAINS UNCHANGED

To develop and operate renewable technology projects to deliver 10GW of clean power by 2035.

SUCCESS FOR WMS

The Wholesale Market Solutions (WMS) team has been busy securing another three Corporate Power Purchase Agreements (CPPAs) and four Contract for Difference (CfD) PPAs.

In 2024, the EDF PPA team supported 1.72TWh of renewable generation through Corporate Power Purchase Agreements (CPPAs). They are working towards their target of supporting 4TWh by 2030.

To help achieve this, the Wholesale Market Solutions (WMS) team has been busy securing another three CPPAs and four Contract for Difference (CfD) PPAs. Combined, these PPAs bring in £4.9m of value to WMS:

- Transport for London CPPA – supporting TfL's net zero ambitions and EDF power solutions' solar project in Longfield for up to 110GWh each year.
- Three CfD PPAs with Octopus Generation – enabling the roll out of a further 172GWh of solar each year.
- A co-located CfD PPA with Cero for a solar/BESS asset in Bramley, adding 61.5GWh of solar each year.
- University of Manchester CPPA – supporting a new Enviromena solar farm generating 72GWh per year.
- A Tesco CPPA where the supermarket giant will take 65% of the clean electricity generated by Cleve Hill Solar Park – enough to power around 144 of their large stores.

FROM FOSSIL FUELS TO WIND POWER

North Kyle Wind Farm is a great example of a successful CfD PPA between WMS and Brockwell Energy. With 49 turbines and a generating capacity of 220MW, North Kyle in Ayrshire is set to power around 183,000 homes every year. The wind farm is built on a former coal mining site, which is being transformed into a hub for renewable generation. By replacing a fossil fuel legacy with wind power, North Kyle is a powerful symbol of Scotland's shift toward a net zero future.

Members of the PPA team visited the site recently to make a film. Leah Whitaker, Senior Marketing Executive, said: "It was an incredible experience to get an up-close look at this landmark renewable energy project, especially one with such interesting history."

SING ALONG WITH COMMUTER KARAOKE

We're revving up the nation on their morning commute with 20 feel-good favourites.

Customers on our **GoElectric EV tariff** can drive their 20-mile commute for as little as 51p. To celebrate this, the Media Relations team asked the nation for their favourite commuting tracks and compiled them into a Spotify playlist with 20 mood-boosting tunes for the daily drive.

Research by EDF finds 'Don't Stop Me Now' by Queen is the nation's favourite commuting track.

The campaign is supported by a range of social media EV-driving influencers including

- Steph (aka Geordie Hiker)
- Warren Hoyte
- Abbie Dewhurst
- Ozayr and Beenish

Watch their videos on Instagram and stream the GoElectric: UK Commuter Hits for free on Spotify.

90%
of Brits admit that listening to a feelgood playlist is enough to brighten their day and boost their mood.

71%
putting them in a positive mindset.

43%
giving them energy.

44%
and increasing focus as well as motivation.

TOP 10 COMMUTING SONGS

1	Don't Stop Me Now, **Queen**
2	Beautiful Day, **U2**
3	Go Your Own Way, **Fleetwood Mac**
4	Mr. Brightside, **The Killers**
5	Livin' On A Prayer, **Bon Jovi**
6	I Wanna Dance with Somebody, **Whitney Houston**
7	Adventure of a Lifetime, **Coldplay**
8	Don't Look Back In Anger, **Oasis**
9	Gimme! Gimme! Gimme!, **ABBA**
10	We Found Love, **Rihanna**

EVERY JOURNEY STARTS WITH A SINGLE STEP

Mental Health First Aiders **Ben Ireland** and **Alistair Wasey** talk about their mental health struggles and how it has helped them be more present as fathers.

Ben is a Cycle Planner for Nuclear Operations. He has a daughter who's two and a half and a son who's nearly 15.

Alistair is an Independent Nuclear Safety Assessment Engineer. He has three children, aged nine, seven and five.

Ben: My mental health journey started after my marriage broke down. I found myself with an emotional pain in my head that I couldn't get rid of. I was diagnosed with anxiety and depression and started using alcohol to cope. It felt like I was stuck in a hole. When I finally asked for help, it was like someone reached down and said: "I've been there. I'll help you out." That changed everything.

Alistair: I've also had anxiety and depression for many years and suffered a number of breakdowns. I'm now being assessed for autism and ADHD. What I've learned is that getting better is not an event, it's a journey and a direction.

Ben: If you need to start that journey, a great first step is to talk to your Mental Health First Aider.

Alistair: Absolutely. You're not a burden. When you're down that hole, you'll find many people reaching a hand down to pull you out. It's OK to feel and to talk.

Ben: Yes, talking is essential. Therapy and joining the men's mental health group helped me become more emotionally available for my kids. I'm sober now, and I focus on being present for them.

Alistair: That's so important. Being a dad helped me to express a softer side of myself. I want to be a 'proper daddy' and not distant like my own father was. I've learned I need to rest, be gentle and show love.

Ben: I grew up thinking that being a man meant being tough and silent. Now I know it's about being emotionally available, guiding my children and helping them understand that emotions are a part of life and that's OK.

Alistair: It breaks my heart when I read about young men struggling with their identity. We need to show them that there are many ways to be a man. Masculinity should include kindness and care. Being strong means protecting, not dominating.

Ben: I'm proud of the work I've done even though it's been hard. I just want to be a good dad – there's nothing more important to me in the world.

Alistair: Thank goodness we're now in this space where men are learning that we can talk and reach out. When you do, you'll find many people ready to listen and help. As fellow human beings, we want to see each other thrive.

If you're ready to take that first step or just want to find out more, email: Kyle.Smith2@edfenergy.com

"Struggling in silence helps no one, that's why we have the EDF Man Club, supported by the Mental Health Supporters Network. It's a safe, judgment-free space to talk, listen, and connect with others who truly understand.

KYLE SMITH
VICE CHAIR OF THE MENTAL HEALTH SUPPORTERS NETWORK AND MANAGER OF THE EDF MAN CLUB

JOIN THE EDF MAN CLUB

FROM SAFETY CASES TO CYBER SPACES

SUCCESS IS *PERSONAL*

Donald Zindoga is Cyber Security Lead at Torness. He tells us about his role and how his stepfather's career in nuclear energy inspired him.

The UK's cyber threat landscape is evolving rapidly, with attacks on critical national infrastructure growing in sophistication and frequency. As a Cyber Security Lead at Torness Power Station I contribute to EDF's wider cyber security community. I lead strategic initiatives to strengthen the resilience of our operational technology systems.

My journey began in 2016 as a Safety Case and Design Engineer at Torness. I focused on industrial control systems and transitioned to Cyber Security. I've benefited from outstanding mentorship and support of my managers and colleagues, helping me grow into a subject matter expert and leader.

A highlight was representing EDF at the first WANO Cyber Security Workshop in Prague – a proud moment to reflect on how far I've come and the value I now contribute back to the business.

FAMILY BUSINESS

This journey is also personal. My stepfather Ivor's career spans multiple power stations, including Torness. As Torness approaches defueling and decommissioning, he often shares insights and advice from decades of experience with me – a special full-circle moment for both of us.

To anyone considering their next step: your path won't always be linear. Stay curious, flexible and open to opportunity. You never know where it might take you!

PEDAL POWER PAYS OFF

Teams from across Nuclear Operations and Nuclear Services raise more than £55k on the H2H charity bike ride challenge.

In their biggest fleetwide charity event to date, 68 riders cycled 100+ miles from Heysham to Hartlepool to raise funds for Alzheimer's Society and Alzheimer Scotland.

Day one was a tricky 70-mile route, with plenty of hills and winding roads. After an overnight stop, the riders set off on the final stretch. By the time they crossed the finish line they were greeted with cheers, drinks and a well-earned medal.

The team has raised an impressive £55,893 so far. You can donate through Just Giving, search for H2H Charity Bike Ride Challenge.

Sponsor and Hartlepool Station Director Mark Lees said: "It's been a privilege being part of this event, and the collective outcome of everyone's efforts has made a huge impact to Alzheimer's. Thanks to everyone who took part, and to all of those who donated".

WHERE IN THE WORLD?

FROM LAVA FLOW TO SOLAR GLOW

EDF power solutions Coulée Blanche solar plant on Martinique is helping the island have a more self-reliant and decarbonised energy system.

Martinique, the Caribbean

The Caribbean Island of Martinique still relies heavily on imported fuel oil which powers around 73% of the island's electricity.

Coulée Blanche solar power plant is a big step towards a more sustainable future. Built on an old lava flow just north of the town of Saint-Pierre, it has a capacity of 4 megawatt peak (MWp) – enough to supply electricity to around 7,500 people every year, nearly double the population of Saint-Pierre.

EDF power solutions is also investing in the local community by funding cocoa planting, restoring wasteland with the AFAF Martinique Association and supporting biodiversity. More than €2 million has already gone to local businesses.

"This marks a decisive step towards Martinique's energy transition. The Coulée Blanche power plant brings us closer to the goal of producing 100% of our energy from renewable sources by 2030.

CHRISTIAN RAPHA
MAYOR OF ST PIERRE

SHIMMERING SUMMER QUIZ

It's July which means summer is here! Brighten up your day with our seasonal quiz.

1. Around which date is the summer solstice celebrated in the Northern Hemisphere?
A. 10 June
B. 17 June
C. 21 June

2. Stonehenge is famous for its solstice celebrations. When is it thought that the stones were set up in its centre, approximately?
A. 2500 BC
B. 2000 BC
C. 1500 BC

3. Who was the men's singles champion at Wimbledon 2025?
A. Janik Sinner
B. Carlos Alcaraz
C. Novak Djokavic

4. Summer pudding is fruit and fruit juice soaked in what?
A. Sponge
B. Wafer
C. Bread

5. The hottest temperature in the UK on record was in Coningsby, Lincolnshire in 2022. What was it?
A. 35.3°C
B. 38.3°C
C. 40.3°C

6. The song Summer Nights is from which popular film musical?
A. Grease
B. La La Land
C. West Side Story

7. The Notting Hill Carnival takes place over the August Bank Holiday weekend. In what year was it first held?
A. 1960
B. 1966
C. 1972

8. What traditional rowing event is held on the River Thames in early July?
A. Oxford Regatta
B. Henley Royal Regatta
C. Thames Boat Race

9. Which teen drama of the early 2000s had a character called Summer Roberts
A. The O.C.
B. One Tree Hill
C. Skins

10. Which major agricultural event is held in Wales in late July, featuring livestock competitions and countryside sports?
A. The Great Welsh Fair
B. Royal Welsh Show
C. Cymru Country Days

Answers: 1c; 2a; 3a; 4c; 5c; 6a; 7b; 8b; 9a; 10b.

LIGHTS, CAMERA, TAKING ACTION

World Environment Day, celebrated every year on 5 June, is the United Nations' global day of action to raise awareness and inspire efforts to protect the environment. This year, we invited colleagues to take part in our Sustainability Champion Photo Contest, sharing images of action being taken and showing what sustainability means to them.

Our winner is Chemistry Engineer Jacqueline Wallace with her photo of Torness power station.

↗ View of Torness (my workplace) from Skateraw Beach. This is one of our favourite walks. The area is a wildlife haven with a diverse bird and insect population. Lots of the land around the site has been returned to nature including the grassland surrounding the site for nesting birds.

ALL TOGETHER NOW

The RACE Network, together with the Women's Network, recently hosted a powerful panel event on what inclusion means in 2025. On the panel was Paul Anderson-Walsh, an author, thought leader and inspirational speaker, who's spent the last 30 years helping organisations prioritise inclusion so everyone feels like they belong.

It was also a special event for CEO Simone Rossi, who joined the panel in his new role as executive sponsor of the RACE Network.

RACENetwork Race and Cultural Equality | Women's Network

TREKKING FOR CHARITY

A team of over 30 colleagues from across the business successfully completed the Alzheimer's Society's Trek26 Cotswolds Way fundraising event earlier in July, raising over £14,000 for our charity partner.

Beverley Boyce, a Finance Admin Support Secretary from Gloucester Business Park, took part in the trek and said: "It was a tough challenge for me, but the team I was with were absolutely amazing and we pushed through and did it. The day was fabulous, people were fabulous, and it was fantastically organised."

FIND OUT MORE ON eNZO

HINKLEY POINT C CATERING DOCUMENTARY HITS OUR SCREENS

A new ITVx documentary goes behind-the-scenes at Somerset Larder, the catering company feeding 12,000 people daily at Hinkley Point C.

In 2024, half a million bacon butties and 42 tonnes of sausages were served – enough to stretch from the construction site all the way to Swindon. The programme shows chefs preparing hundreds of steak and chips portions, stirring enormous vats of sauce and making salads by the crate-load.

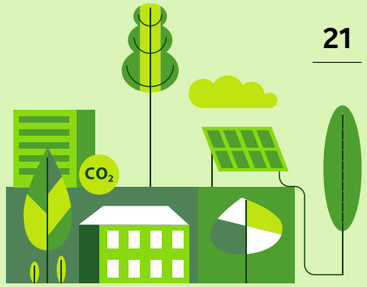

Somerset Larder uses locally sourced ingredients, with meat and dairy supplied by over 60 regional farms. Martin Wilson, Senior Chef Supervisor, said: "The quantities of food we're preparing are just huge. The site has grown so much – I remember when we were feeding a few hundred people a day. Now it's thousands!"

CHAMPIONING INCLUSION AT WIN GLOBAL 2025

As a headline sponsor of the 2025 Women in Nuclear (WiN) Global Conference, we proudly reaffirmed our commitment to an inclusive nuclear industry. It reflects our belief that diverse perspectives drive innovation, and that every woman should feel welcomed, valued, and empowered to thrive in our industry.

The event offered a valuable platform to connect with global talent, share insights, and learn from inspiring leaders. We hosted a workshop on conscious inclusion, welcomed hundreds to our Success is Personal themed stand and heard speeches from Michelle Hoy, Nuclear Operations Technical Director, and WiN UK President, Clare Sharpe, EDF's Transfer and Deconstruction Director. Congratulations to Niki Rousseau who was highly commended in the Champion of the Year category at the event's awards.

SMALL CHANGES, BIG IMPACT

Net Zero Week, from 7-11 July, was a chance to focus on the positive changes we can all make to help build a more sustainable future.

Each day, Nuclear Operations showcased some of the fantastic things that are happening around the fleet to drive net zero and sustainability, with daily articles and informative videos, sparking ideas on everything from how to cut carbon and give things a second life.

Dalkia provided net zero learning opportunities through its e-learning platform, MyAcademy, and held Climate Fresk workshops and webinars on supply chain engagement and current decarbonisation projects. They also raised nearly £300 for the British Heart Foundation through a prize draw for home energy saving goodies.

You can find out who your local Sustainability Coordinator is, calculate your carbon footprint and ask how you can be more sustainable within your role on eNZO.

OUR PHOTO COMPETITION IS NOW OPEN FOR ENTRIES

SHARE YOUR MOMENTS THAT MATTER

The theme for this year is moments that matter. Whether it's time in nature, a life event, work-related or being with the special people in your life, moments that matter can be quiet or loud, big or small.

Upload your photos to the Connect Online photo competition page by 26 August.

WINNERS OF CONNECT'S PHOTO COMPETITION ACROSS THE YEARS
