Fixed + Energy Trading

Partially fixed electricity contracts for business customers

Fixed + Energy Trading

explained...

Our Fixed + Energy Trading contract gives you the opportunity to buy your energy flexibly into the future

How could Fixed + Energy Trading help your business?

- ✓ **Minimise the impact of market volatility** by spreading out risk
- ✓ Spreading your energy purchases could help you to **secure favourable market prices**
- ✓ **Eliminate exposure to non-energy cost fluctuations** Our experts work hard to forecast costs as accurately as possible
- ✓ **Maintain flexibility in your billing process** by having the choice of Live or Reconciliation billing
- ✓ Choose from a range of zero-carbon electricity options **to support you on your journey to net zero**

Fixed + Energy Trading explained...

We understand businesses want to take advantage of variable wholesale prices to save on energy costs. With Fixed + Energy Trading, **you have the ability to buy energy 1-4 years into the future,** putting you in control.

How does it work?

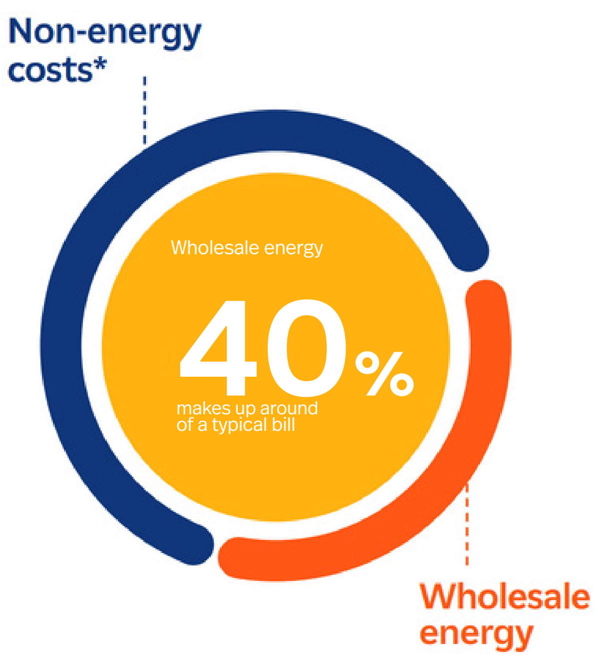
Your electricity bill comprises two main elements:

1. **The cost of electricity** purchased on the wholesale market
2. **Non-energy costs**, which are set by third parties and are related to

the delivery of your electricity and investment in future generation

With Fixed + Energy Trading, your energy can be purchased flexibly in blocks, allowing you to trade energy according to your business' risk profile.
Your non-energy costs are based on a forecast. While our highly experienced Wholesale Market Experts do all they can to keep your non-energy costs stable, this product does allow for some fluctuation. If non-energy costs end up higher than the forecast, there may be an increase in the price you pay.

With Fixed + Energy Trading, you have full control of your energy purchases, while non-energy costs are based on a forecast.

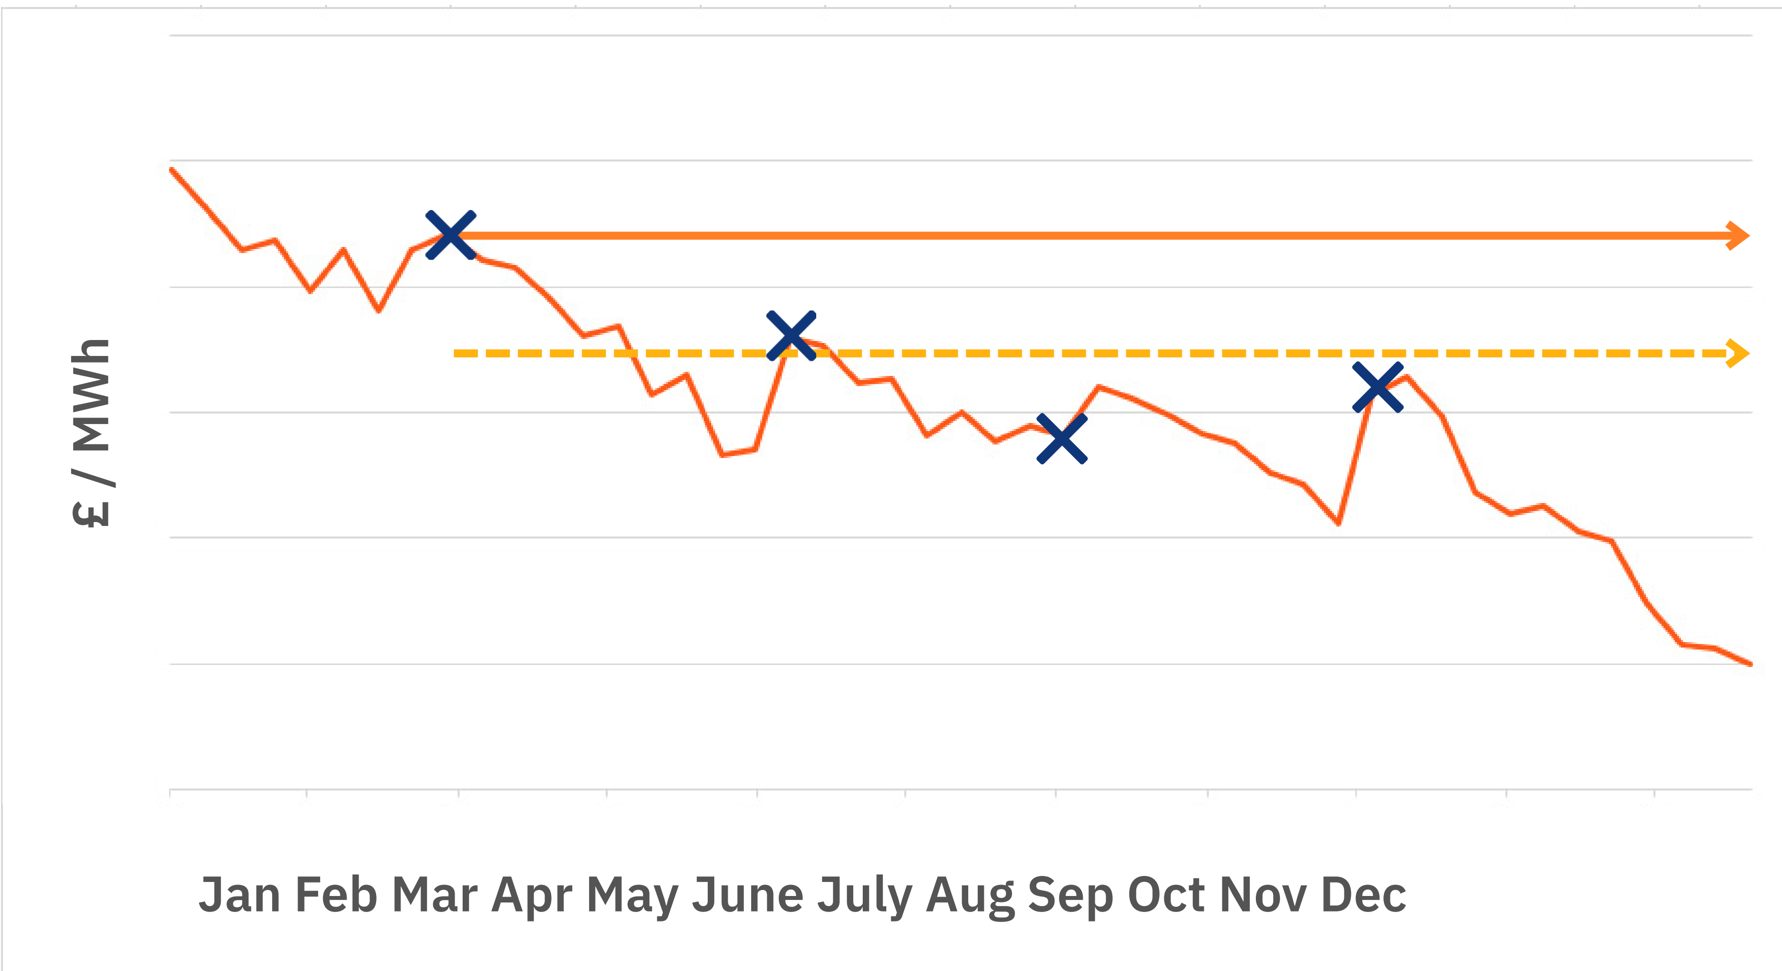


*These non-energy costs are based on our forecast and may vary

Fixed + Energy Trading

explained...

Spreading your energy purchases provides a more market reflective price



Purchase your energy in monthly blocks throughout your contract period. You can choose to buy the full amount upfront or a portion of it, such as 50% of the total volume via purchasable 'blocks'.

Fully fixed contracts provide price certainty, which can be beneficial if energy prices rise after you fix, but can see you lose out on savings if they fall

With Fixed + Energy Trading, you have the option to buy parts of your energy at different times, providing a more market reflective price

Fixed + Energy Trading

explained...

Why choose Fixed + Energy Trading?

When you sign your Fixed + Energy Trading contract with us, you'll have the option to buy your energy in blocks ahead of time, to fit your budget and risk level.
