

# CLARITY

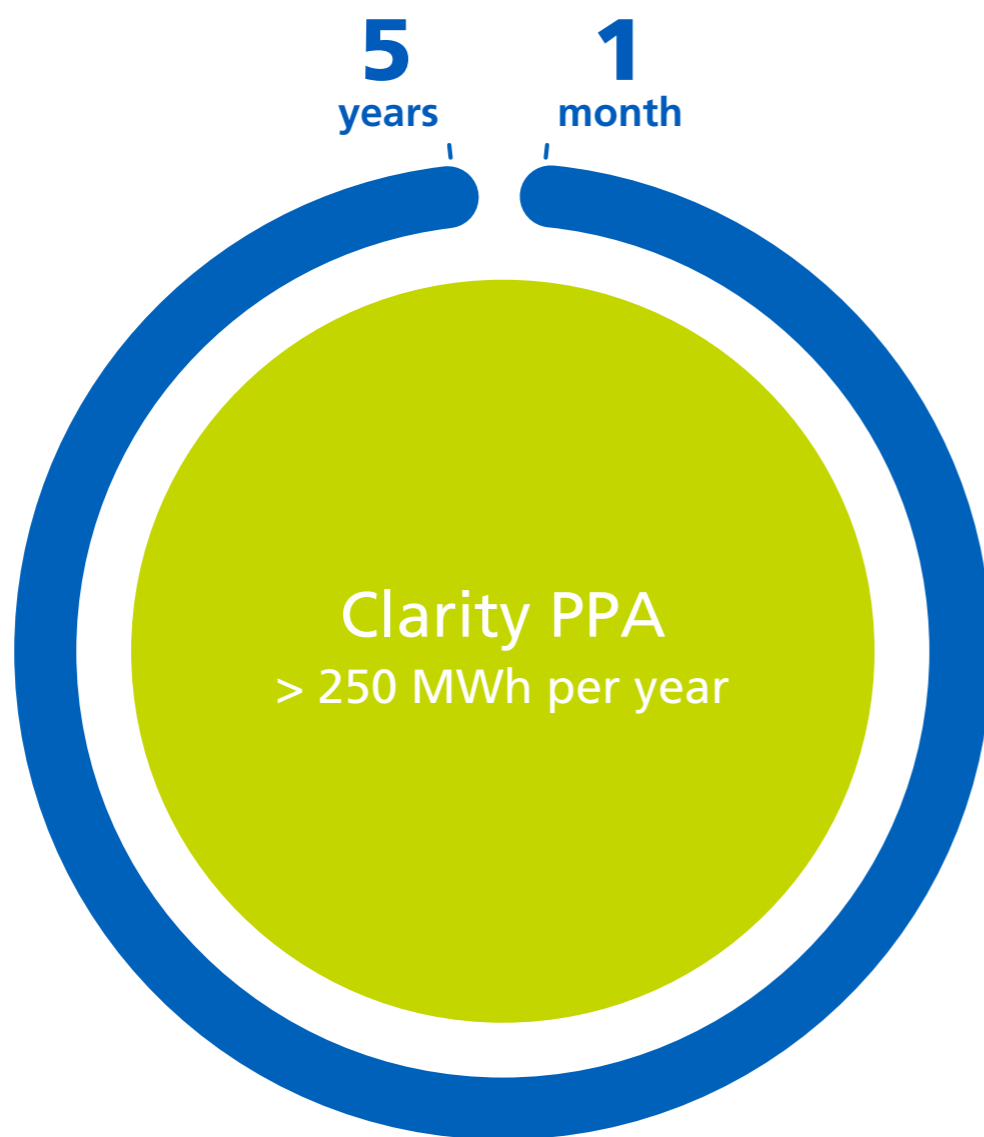

## POWER PURCHASE AGREEMENT

# Clarity Power Purchase Agreement

Our Clarity PPA is designed for generators that want to get paid market reflective prices. The Clarity PPA recognises that your output can be variable and enables you to renominate your output up to two days before delivery within an agreed volume tolerance. The prices paid are linked to a published wholesale market index.

# Clarity Power Purchase Agreement

## The main features of this contract are:

- Control over when, and how long, you generate for
- Clear, transparent prices based on a recognised, published index (e.g. N2EX or SSP)
- Contract duration between 1 month to 5 years
- Near term reforecasting enabling active management to deliver within volume
- Ability to sell your ROCs and REGOs

Energy Output Variable

Your forecast Short-term

Management Semi-active

Expertise Semi-expert

# Clarity Power Purchase Agreement

## How does it work?

The Clarity PPA meets the needs of generators able to control their output, with their own view on market prices, and looking for a market reflective price for their output. This contract enables you to maximise your output but retain flexibility in how and when to forecast your output. Volume tolerances are agreed upfront so that you are clear on your contractual obligations before you commit.

You can also sell your ROCs and REGOs within the Clarity PPA.

## Why choose this option?

Our Clarity PPA suits generators who want to get paid a market reflective price. With this contract, your business has complete clarity over the price you sell your energy at; and the price paid reflects the wholesale market conditions throughout the contract. This ensure that you will always benefit from rising wholesale prices, but equally have the control over when to generate and when not to generate which may be useful in a falling market.

This contract is suitable for generators exporting more than 250 MWh per year. A volume tolerance may be applicable and will be agreed prior to contract signature.

## Is the Clarity PPA right for me?

If electricity generation is a core element of your business, you will want to choose the right time to export and maximise your return. If your main driver is flexibility with a market reflective price, the Clarity PPA provides you with the framework to ensure that you can export your power when you want to.

As the Clarity PPA is directly linked to the electricity wholesale market price, your business is not guaranteed a fixed price for your output; if budget certainty is important to you, consider our Certainty PPA as an alternative.

# How do I get started?

We have a number of contract options for your business; if you think that our Clarity PPA is right for you, get in touch with the Export Team to discuss how we can help. Call us on:

## e-factsheet - a better way of working

Why an e-factsheet? At EDF Energy we are committed to using the most sustainable working practices wherever possible and this includes when delivering communications to our customers.

E-factsheets significantly reduce the volume of printed material we need, reducing our carbon footprint.

Our customers appreciate e-factsheets because they offer timely delivery of easy to access information in an ideal format for the modern screen based working environment.
