Prices shown in both tables include VAT. They are made up of a daily standing charge and the relevant unit rate (kWh). We explain the rates in more detail in the notes section on page 4.

¹ The daily standing charges (where shown) are due each day and per meter whether or not you use any electricity or gas at your premises as supplied by EDF Energy.

² Standard meter - This is the most common type of meter for electricity and gas. These meters display your consumption either using a mechanical clock, digital display or dial.

³ Economy7 meter - Also known as E7, this is a two-rate meter for electricity (day and night - providing a cheaper rate seven hours a night which can provide savings on your account). These meters are often installed in properties without a gas connection and so the heating and hot-water supplies depend on electricity (for example, storage heaters). Night kWh will be supplied for a total of seven hours, typically between 10pm and 8am (actual times set by the local network operator and can be found on your statement) and these will be charged at the night kWh rate. All other kWh will be charged at the day kWh rate.
