

Deemed electricity and gas - credit prices

Direct Debit is the cheapest way to pay for your energy because your unit rate is lower in comparison to other payment methods.

Electricity and gas credit prices are effective from 1 February 2019.

Supply area and payment method		Electricity prices					Gas prices	
		Standard meter ² electricity prices		Economy 7 meter ³ electricity prices			Standard meter ² gas prices	
		Daily standing charge ¹	Unit rate (kWh)	Daily standing charge ¹	Day rate (kWh)	Night rate (kWh)	Daily standing charge ¹	Unit rate (kWh)

¹ The daily standing charges (where shown) are due each day and per meter whether or not you use any electricity or gas at your premises as supplied by EDF Energy.

² Standard meter - This is the most common type of meter for electricity and gas. These meters display your consumption either using a mechanical clock, digital display or dial.

³ Economy7 meter - Also known as E7, this is a two-rate meter for electricity (day and night - providing a cheaper rate seven hours a night which can provide savings on your account). These meters are often installed in properties without a gas connection and so the heating and hot-water supplies depend on electricity (for example, storage heaters). Night kWh will be supplied for a total of seven hours, typically between 10pm and 8am (actual times set by the local network operator and can be found on your bill) and these will be charged at the night kWh rate. All other kWh will be charged at the day kWh rate.
