

Hunterston B monthly report

May 2017

Introduction

We are keen to hear the views of our local communities. We recognise that good communication is a two way process and we welcome your feedback and comments. While we will do our best to always use plain English, talking about our business sometimes involves specific terminology, and you will find a glossary of any terms used at the end of each monthly report.

Station output

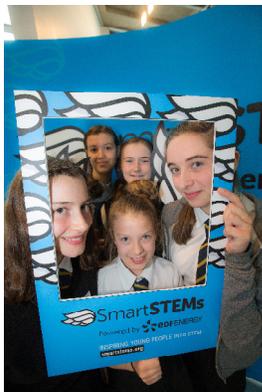

Both unit 7 and unit 8 were operating throughout the month of May.

Safety

- There were no lost time incidents (LTIs) for EDF Energy staff in May meaning 3,363 LTI free days up to the end of the month, that's more than nine years.
- There were no lost time incidents (LTIs) for contracting partner staff in May meaning 3,351 LTI free days up the end of the month, that's more than nine years.
- The station had no emergency service call out during May.
- There were no on site medical treatments during the month.
- The station had no environmental events during the month and has gone 425 days without an environmental event.

Station News

Hunterston B support girls in STEM events

Some of enthusiastic volunteers from Hunterston B recently supported a series of events designed to encourage more girls to study STEM subjects. The volunteers supported a session at Ayrshire College as part of EDF Energy's headline sponsorship of the [SmartSTEMs](#) programme.

More than 1,300 girls have attended events across the West of Scotland over the past two weeks to hear from female STEM role models and take part in hands-on workshops. Visitors to EDF Energy's exhibition stand were able to experience our virtual reality Pretty Curious video which gave the girls an insight into the careers of three women working in STEM careers.

Company news

Operation Temperer

Following the attacks in Manchester the government raised the threat level within the UK to 'critical' which in turn initiated Operation Temperer. This meant UK police forces could call on extra armed officers drawn from sites such as EDF Energy's nuclear sites.

To ensure the armed response levels were maintained at our nuclear sites, military personnel replaced those Civil Nuclear Constabulary officers drafted in to support Operation Temperer.

Once the UK threat level returned to 'severe' the CNC officers returned to our sites and the military personnel back to their barracks.

Next local community meeting

The next Site Stakeholder meetings (SSG) is on 7 September 2017.

This meeting will take place at the Seamill Hydro, West Kilbride; lunch will be at 1 pm, followed by the meeting at 1.30 pm. Members of the public are welcome to attend, and these meetings will be advertised in the local press.

Glossary of terms

Term	Definition
Unit	A unit refers to one of the reactors at the power station and its generating turbine
Nuclear reportable event or incident	Nuclear reportable events are significant events, such as non-compliance with or inadequacy in the safety case. These (along with other, less significant events) are reported to the Office for Nuclear Regulation (ONR) in compliance with EDF Energy's nuclear site licences.
Environmental event or incident	Environmental events arise from wastes or discharges above permitted levels or breaches of permitted conditions which result in an environmental impact. These (along with other, less significant events) are reported to SEPA.
Lost Time Incident (LTI)	When a member of staff injures themselves at work, and is absent from work for one day or more, this is referred to as a lost-time incident (LTI)
Outage	A period during which a reactor is shut down. The periodic shutdown of a reactor including for maintenance, inspection and testing or, in some cases, for refuelling is known as a planned outage. In the UK, some planned outages are known as statutory outages and are required by the conditions attached to the nuclear site licence needed to operate the station. Unscheduled shutdown of a reactor for a period is known as an unplanned outage.
