

**“Being on the graduate scheme I have a mentor, buddy and a career manager so there is always someone to go to for advice, regardless of the topic!”**

Rachael Shuttleworth, Renewables Graduate

## **What experience will I gain during the Renewable Energy Engineering programme?**

During our 15 month Renewables Science & Engineering training programme you'll be making a direct contribution to help Britain achieve Net Zero. You'll learn from our experts, gain valuable experience taking part in 5 assignments across our Renewables business, all with the support of an assignment manager, mentor and buddy throughout the programme.

## **What kind of placements will I complete?**

Our programme is designed to help you develop a broad set of skills, with the opportunity to specialise towards the end of the programme, when you'll start to think about a permanent role.

Following a week-long induction, with graduates from all of our schemes, in September, you'll head straight into your first placement. Assignments could include working with:

- Our technical competency centres within our Central Technical Organisation
- Project Engineering, supporting our Operational Portfolio
- Offshore Wind Construction Projects
- EDF Group, including Hynamics (EDF's dedicated subsidiary for green hydrogen production), in France

## **EDF Renewables UK & Ireland**

EDF Renewables purpose is to accelerate a net zero future where clean energy powers our lives. We want to make the net zero future happen as fast as we can. We want to set the pace and, where necessary, disrupt the status quo and transform perceptions. We are here to combat climate change, this is a clear and tangible goal for us. Climate change is what galvanises us to bring the right solutions to the UK and Ireland.

Our mission is critical in the pursuit of our purpose, we will lead the way in the delivery and operation of renewable technologies. We are proud to utilise fully our EDF heritage and place ourselves at the core of the industry. We are constantly challenging ourselves to improve the way things are being done. We bring leadership to our interactions and collaborations with one another, how we influence our partners and external bodies, how we use technology.

At EDF Renewables UK & Ireland, everyone's welcome. We strive to create an inclusive environment where everyone has a voice and where they can feel confident being themselves. We'll value the difference you bring and give you opportunities to thrive and succeed.

We're an equal opportunities and a disability confident employer. If you meet the minimum criteria for a role, share with us if you have a disability and we'll guarantee you an interview.

Join us. Together, we'll help Britain achieve net zero.
