

29 January 2018

Dear SSG Member,

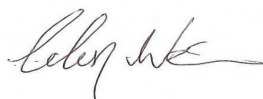

As a member of our community, I believe it is important to keep you updated on any developments at Hunterston B Power Station.

I previously told you that Unit 7 at the power station had come offline on the evening of Tuesday 23 January due to a fault on an electrical motor and fan within the reactor side of the system.

I am pleased to say that after carrying out a full investigation and repair work Unit 7 returned to service on Saturday 27 January.

Hunterston B power station has generated low carbon electricity since 1976 and in 2017 provided enough electricity for more than 1.8 million homes.

I hope this information is useful to you as a member of the Site Stakeholder Group. Should you wish to ask any questions please feel free to ring the Station on 01294 826000 and ask for our Communications Officer, Nikki Thomson.

A handwritten signature in black ink, appearing to read 'Colin Weir'.

Colin Weir
Station Director
